

## Genetic Epidemiology of Prostate Cancer in Africa Inclusion/Exclusion Criteria-Cases

**Prior to, and whilst meeting with a potential case in the clinic, determine that he meets ALL inclusion criteria (below) and does not meet ANY exclusion criteria.**

### **Inclusion criteria**

- 1) Prostate Cancer diagnosis within the 6 month-period prior to date of recruitment (we can pilot test this in the beginning of the study and if it is too challenging we can extend to 1 year).
- 2) Age 30 and older at Prostate Cancer diagnosis.
- 3) Male resident of the catchment area defined by each center.
- 4) Self identifies as black/African ancestry with no known European/Middle Eastern/Asian ancestry (parents, grandparents). For example in S. Africa would exclude coloured designation.
- 5) Departments of potential recruitment: Urology, Oncology, Primary referrals (ensure that is within the catchment area).

### **Exclusion criteria**

- 1) Other cancer diagnosis, except non-melanoma skin cancer prior to ascertainment.
- 2) Failed cognitive assessment and/or unable to consent into study; e.g. patients with Alzheimer, Schizophrenia, Severe Bipolar Disorders.
